

FLOOD SITUATION IN LOWER REACHES OF MISSISSIPPI RIVER WORSE; DYNAMITE LEAVES TO DESTROY RUN-OFF

On the Mississippi lower reaches of the river today a break in the dyke here today, and the Mississippi flood waters were made 2175 ft. in central standard time. The state engineer, Mr. D. M. Dyer, blasted away a stretch of the dyke one thousand feet, releasing the surging waters in the hope that New Orleans would escape from the flood moving down the river from the vast inundated area in the north.

New Orleans, April 29.—While five hundred pounds of dynamite arrived at Port-au-Prince, New Orleans today for the first time since the levee broke, the state engineer, Mr. Dyer, blasted away a stretch of the dyke one thousand feet, releasing the surging waters in the hope that New Orleans would escape from the flood moving down the river from the vast inundated area in the north.

The sinking of the dynamite proved to be much more than the engineers had figured upon, and the time of blasting had to be postponed until some time after 2 o'clock.

Alarming Condition
The situation at Port-au-Prince is alarming condition, and the engineers have been ordered to evacuate the city. The levee broke at a point where it was 100 feet high, and the water was running over the levee.

Over 700 Marooned
Little Rock, Ark., April 29.—The plight of 700 marooned persons who are still marooned in the flooded lowlands of Arkansas is desperate today in a report to the Associated Press by the state engineer, Mr. Dyer.

When the Arkansas river broke at Little Rock, the water was 100 feet high, and the water was running over the levee. The situation is alarming, and the engineers have been ordered to evacuate the city.

REY. SLIGHTER BAYONNETTED BY ATTACKERS WHEN DIED

Hongkong, May 2.—The Rev. Morris Slichter of Toronto, the first of the railway strike men who was murdered recently near the Leithridge, Ontario, Mill Spring, was bayoneted after he had been thrown to the ground, according to mail from his wife here from that place, today, bearing the date of April 29. Slichter was a member of the Macleod base ball club, and his death was a great loss to the club.

Dynamite Levee Further
New Orleans, April 29.—Additional charges of dynamite were fired today at the opening in the levee today widened the gap near the river fifteen miles below the city in an effort to widen the breach and allow for a greater flow of the flood waters. A call was made to New Orleans today for two more tons of dynamite.

The first charge of dynamite shot into the levee today widened the gap near the river fifteen miles below the city in an effort to widen the breach and allow for a greater flow of the flood waters. A call was made to New Orleans today for two more tons of dynamite.

Memphis, Tenn., April 29.
Two new levee breaks and threat of at least five more under the two new levees today widened the gap near the river fifteen miles below the city in an effort to widen the breach and allow for a greater flow of the flood waters. A call was made to New Orleans today for two more tons of dynamite.

The scope of the disaster can be seen by the fact that the levee broke at a point where it was 100 feet high, and the water was running over the levee. The situation is alarming, and the engineers have been ordered to evacuate the city.

THURSDAY, MAY 5th, 1927

STUPID CRIME

Down in New York they are trying Henry Judd Gray, a Canadian man, and Ruth Snyder, for the murder of Mrs. Snyder's husband, old husband.

It appears that Gray and Mrs. Snyder conceived a violent dislike for one another. Snyder was in the way. So they got him drunk, choked him, beat his skull in with a window weight and choked him to death with piano wire.

The case is notable because it is probably the classic example of how easily stupid crime may be. There were a dozen ways that Gray and Mrs. Snyder might have satisfied

their ambitions without this brutal and futile act.

But if the Snyder murder is notable for its stupidity, so all crime, in a greater or lesser degree, stupid and futile.

Aside from all moral considerations, crime is always the most tortuous, dangerous, expensive and inefficient way in which any purpose can be accomplished.

There is no legitimate end on earth that cannot be attained by legitimate means. Anything that man can imagine, man can do in a normal, sane and sane way.

There is no such thing as an intelligent criminal. All the talk about "great" criminals is the merest hokum.

The man who commits crime commits his inferiority, his laziness and his lack of brains.

SAVINGS OR INDUSTRY?

Savings bank deposits in Canada are announced, reached their high point in the history of the Dominion at the end of February, when they aggregated \$128,000,000.

This represents an increase of \$6,000,000 over the previous month and an advance of \$27,000,000 over February of 1925.

This is healthy. It indicates national prosperity and national thrift. But what would be even more indicative of national prosperity would be the figures showing the rate at which these savings are being placed at the disposal of leading Canadian industries.

The thing that makes a country develop and grow is not the amount of money it HAS, but the amount of money it USES. It is reassuring to have a billion dead dollars. But it is real prosperity to have a billion live working dollars.

The finest service the banks of this country could render Canada would be to educate their clients in the practice of investing reasonably, if reasonably Canada industries.

THEN AND NOW

Lately the Prince of Wales arrived in Seattle.

Vaccination against small-pox is well known, but some are still opposed to vaccination. In the last Century 25 years previous to Dr. Jenner's introducing vaccination 15,000,000 people died with small-pox. Since that time the death rate is low. Detroit had an epidemic of small-pox in 1924, with 161 deaths. There were no deaths among those who had been recently vaccinated.

Diphtheria also used to be a very dangerous disease, now successfully controlled by antitoxin. If given soon after exposure to the disease the ordinary case will usually confer an immunity for 1 or 2 weeks.

The better time to immunize is when there is no diphtheria around. Everyone is not susceptible to diphtheria. We can determine who

is by giving a skin test. Then a toxin-antitoxin can be given in 3 doses at intervals of 5 days which will confer an immunity for years and possibly a life-time.

Typhoid fever can also be controlled. For this we have a vaccine given in 3 doses at 7 day intervals which is very effective in preventing the disease. During the South African war with average troops 200,000 they had 3000 deaths from typhoid. In the Great War with average troops 2,000,000 they had 1100 deaths from typhoid. This great difference is due to vaccination in the late war.

For scarlet fever we have a vaccine, which, when given in early stages of the disease has reduced the mortality rate from 50 to 10 per cent when given. This serum if given very soon after exposure is a successful preventive for about two weeks.

For whooping cough we have a vaccine which is fairly successful in preventing the disease. Other diseases, although not contagious, are prevalent in our community and are often preventable. Gout would be very rare if every child took a proper quantity of iodine in some form each year.

Hay-fever is generally caused by inhalation of pollen of certain plants, or other protein substances such as dust, feathers, or from eating certain foods. The worst cases can be found by tests, and the corresponding vaccine, if given at proper time each year, will either prevent or mitigate the attack.

Infected teeth and tonsils often cause measles, rheumatism, stomatitis and many other disorders. The moral is to remove the cause, before the onset of these secondary diseases.

"Health Officer" Macleod, Alta.

Even if the missionaries are driven back home, they'll find plenty of heathen to work on.

NO ONE IN CANADA NEED DRINK IMMATURE WHISKY. THE AGE OF "CANADIAN CLUB" WHISKY

IS GUARANTEED BY THE CANADIAN GOVERNMENT

their ambitions without this brutal and futile act.

But if the Snyder murder is notable for its stupidity, so all crime, in a greater or lesser degree, stupid and futile.

Aside from all moral considerations, crime is always the most tortuous, dangerous, expensive and inefficient way in which any purpose can be accomplished.

There is no legitimate end on earth that cannot be attained by legitimate means. Anything that man can imagine, man can do in a normal, sane and sane way.

There is no such thing as an intelligent criminal. All the talk about "great" criminals is the merest hokum.

The man who commits crime commits his inferiority, his laziness and his lack of brains.

PREVENTION OF SICKNESS

During recent years the question of preventive medicine, or how to prevent sickness, is becoming more and more of interest to the Physician.

We are all acquainted with the precautions and measures prescribed in the Public Health Act to prevent the spread of contagious diseases. Other preventive measures are not yet well known to the public in general.

It is our duty as physicians to inform parents what means are at their disposal to prevent sickness in their families.

There have been in recent years great advances in our knowledge of contagious diseases—chiefly through the discovery of the specific germs causing these diseases. From these bacteria are made vaccines, or in an indirect way antitoxins, which are used not only as the treatment of disease but also as a preventive to these diseases.

The better time to immunize is when there is no diphtheria around. Everyone is not susceptible to diphtheria. We can determine who

is by giving a skin test. Then a toxin-antitoxin can be given in 3 doses at intervals of 5 days which will confer an immunity for years and possibly a life-time.

Hot, Charles Stewart, Minister of the Interior, welcome visitors to the Dominion.

The articles and stories contained in the issue cover practically all months of a special Dominion of Canada Tourist number. The May issue is featured by a special section, profusely illustrated, in which the Canadian attractions, which hunting, fishing and outdoor life. Canada has to offer are laid before tourists. An editorial written by the regular departments on Fishing, Game and Ammunition, Outdoor Talk and Kennel.

Hot and Gun and Canadian Silver For News is published monthly by W. J. Taylor, Limited, Woodstock, Ont.

Correct this sentence: "My companion had seen the show before," said he, "but didn't whisper to tell me what was coming next."

For scarlet fever we have a vaccine, which, when given in early stages of the disease has reduced the mortality rate from 50 to 10 per cent when given. This serum if given very soon after exposure is a successful preventive for about two weeks.

For whooping cough we have a vaccine which is fairly successful in preventing the disease. Other diseases, although not contagious, are prevalent in our community and are often preventable. Gout would be very rare if every child took a proper quantity of iodine in some form each year.

Hay-fever is generally caused by inhalation of pollen of certain plants, or other protein substances such as dust, feathers, or from eating certain foods. The worst cases can be found by tests, and the corresponding vaccine, if given at proper time each year, will either prevent or mitigate the attack.

Infected teeth and tonsils often cause measles, rheumatism, stomatitis and many other disorders. The moral is to remove the cause, before the onset of these secondary diseases.

"Health Officer" Macleod, Alta.

Even if the missionaries are driven back home, they'll find plenty of heathen to work on.

well known, but some are still opposed to vaccination. In the last Century 25 years previous to Dr. Jenner's introducing vaccination 15,000,000 people died with small-pox. Since that time the death rate is low. Detroit had an epidemic of small-pox in 1924, with 161 deaths. There were no deaths among those who had been recently vaccinated.

Diphtheria also used to be a very dangerous disease, now successfully controlled by antitoxin. If given soon after exposure to the disease the ordinary case will usually confer an immunity for 1 or 2 weeks.

The better time to immunize is when there is no diphtheria around. Everyone is not susceptible to diphtheria. We can determine who

is by giving a skin test. Then a toxin-antitoxin can be given in 3 doses at intervals of 5 days which will confer an immunity for years and possibly a life-time.

Typhoid fever can also be controlled. For this we have a vaccine given in 3 doses at 7 day intervals which is very effective in preventing the disease. During the South African war with average troops 200,000 they had 3000 deaths from typhoid. In the Great War with average troops 2,000,000 they had 1100 deaths from typhoid. This great difference is due to vaccination in the late war.

THE WHITE HALL

LOCAL AND PERSONAL NEWS

F. R. Frey has purchased a new city, to attend special initiation ceremonies.

R. Jones of Spring Point was a visitor to Macleod this week.

The Rev. Cecil Swanson, of Lethbridge, was in Macleod on Wednesday last.

E. S. Clarke, of South Africa, was a business visitor to Macleod this week.

J. McNeil, of Standoff, has purchased a new Chrysler truck from George Scoullard, the local agent.

Mr. and Mrs. Chester Arthur, of Brockton, were the guests of Mr. and Mrs. Panter for a few days this week.

The Rev. G. McComas, of Christ Church, will conduct matins and communion service at Hamden Church on Sunday morning next.

W. Whitworth has installed a Nizer Electric Refrigerator—the latest and most up-to-date cooling device used in connection with ice cream and soft drink service.

Mrs. C. W. E. Gardiner left to day (Thursday) for Edmonton on the route to Montreal where she is going to meet Mr. Gardiner on his return from England at the end of the month. Miss Claudia Gardiner

is remaining in England for the summer.

S. Brooks was in Lethbridge this week on business.

Ernie Codd, of Lethbridge was a Macleod visitor this week.

The Silver Grill has installed a Nizer Electric Refrigerator.

W. Sherman, of Granum, was a business visitor to town this week.

A. V. Simmons, of Vancouver, was in Macleod this week on business for his firm, The Textile Machine Co.

The Speedway Service station has enhanced its already snappy appearance by the building of a cable stone wall on the west and north sides.

F. J. Cutler, manager of the Empress Theatre, was at Calgary Monday and Tuesday of this week on the occasion of the Board of the Alberta Film Board of Trade.

"Bill" Henderson was in Macleod this week enroute from Calgary to Lethbridge with one of the new special Auburn "victims" of which Bill has taken the agency for the South country.

The tree planting ceremony arranged by the Macleod Women's Institute, will take place at the City Cemetery on either day, Monday, May 9th, commencing at 2 p.m. Mayor McDonald will deliver an address, and it is expected other leading citizens will be present. Cars have been arranged for to transport those who wish to attend, and will leave the rest room at intervals prior to 3 p.m.

The following is quoted from the Vancouver Sun of May 2nd, and refers to E. B. Barnes, who for many years resided at Macleod, and who has many personal friends in this community: "Rennie B. Barnes, 74, of Third street east, a resident of North Vancouver for several years, died here on Sunday. Funeral services will be conducted in Harrison Bros. undertaking parlors on Tuesday afternoon at 2:30 by members of the Christian Science church. Cremation in Mountain View crematorium."

E. H. Oliver, superintendent of utilities at Macleod for the past four years, has tendered his resignation and will leave Macleod on Friday of this week to take charge of the municipal power plant at Lethbridge. Mr. Oliver has proved himself most efficient in his position at Macleod during his tenure of office and his departure will also be regretted by many warm personal friends in Macleod and district. Mrs. Oliver and the family will remain at Macleod till the end of the school term in June, thereafter joining Mr. Oliver at Lethbridge.

The Rev. J. H. Cooper, of London, Ontario, arrived in Macleod last week and has taken the mission work for The United Church of Canada, South of Macleod. He held his first service last Sunday at Allenfield, preaching to a crowded house, and will preach there each alternate Sunday. Next Sunday, May 8th, he will preach at Spring Point School House at 11 a.m. and Olsen Creek, at 3 p.m. Mr. Cooper is a third year Art student from Queen's University, Ontario. Rev. W. H. Irwin preached last Sunday in Olsen Creek school house, next Sunday he will preach in Allenfield School house, at 3 p.m.

In nearly all cities there is a policeman to get you for loitering any place except at a desk.

REACH & COMPANY, Ltd.

GENERAL MERCHANTS—DRY GOODS, LADIES' AND MEN'S UNDERWEAR, BOOTS AND SHOES, GROCERIES, VEGETABLES AND FRUITS.

Remember May 8th 1927, the second Sunday in this month. We are getting some nice pot plants in again, all blooming from the greenhouses. This is a nice custom and should be kept up. The gift of a pot of beautiful flowers lasts longer than a box of chocolates or a glass of beer. If you have never felt that delicious thrill running through you when you present flowers to a Mother's Day. It is worth a dollar to get the thanks and the illumination of the flowers when the recipient beams upon you—a gift of flowers is never forgotten.

Don't forget our great reduction in price on Ladies' Hosiery, all shades. The price was formerly \$1.25. Now we offer them at \$1.00. We have a good wearing silk stocking at the time. To make room for the spring stock of shoes it is necessary to cut on the price. It will be necessary to sell in some cases at cost. But fresh goods must be sold, and this is only possible with your help, in buying shoes and all classes of merchandise that are equally as good, but had the misfortune to be born last year—Although the sale is imperishable. For God's sake get out of that! That you grow of thinking what will people say if you tell them you bought them at Reuch's and for half the price of Lethbridge or Calgary.

REACH & COMPANY, Ltd.

Correct in Principle. Correct in Design

THE MILLS WIRE WEEDER

is built in two sizes, 14 feet and 9 feet.

It is the only weeder which operates on the correct principle to remove weeds, the revolving cables traveling underground bend the roots over and pull them to the surface.

It leaves the weeds on top of the ground with their roots up so they die. Other weeders fail to do this, leaving the roots standing up in the soil so that they grow again.

It is the only weeder which can be adjusted for various weed conditions.

It is shipped out with eight cables per section which are used when weeds are small, or the growth is light. If the growth is thick or heavy, the number of cables is reduced to six or five.

It is flexible and works well in uneven ground.

It does not pulverize the soil.

It is strongly built for hard service.

It is worth its weight in gold to the farmer who has weed trouble.

It is the only sure weed remover on the market today.

A machine will be on display in a short time.

GET A MILLS WIRE WEEDER FROM
